

第三周主要修复了画质差的问题，发现在球形的pdf里面存在使用错误的常量，最终实现了第三本书最后的效果。

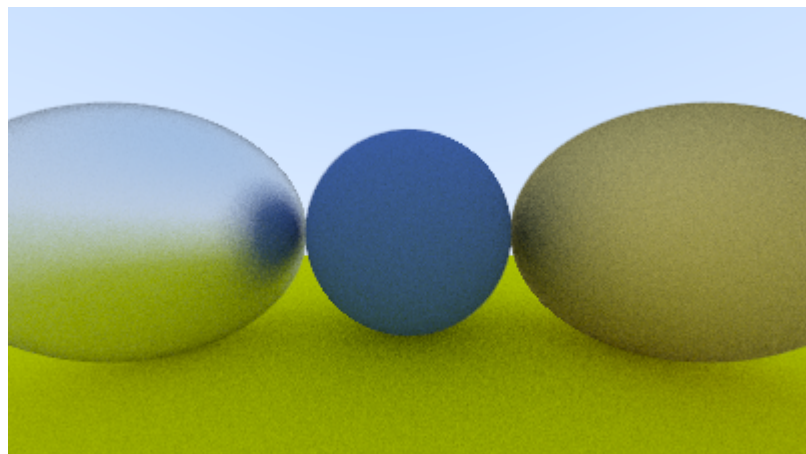

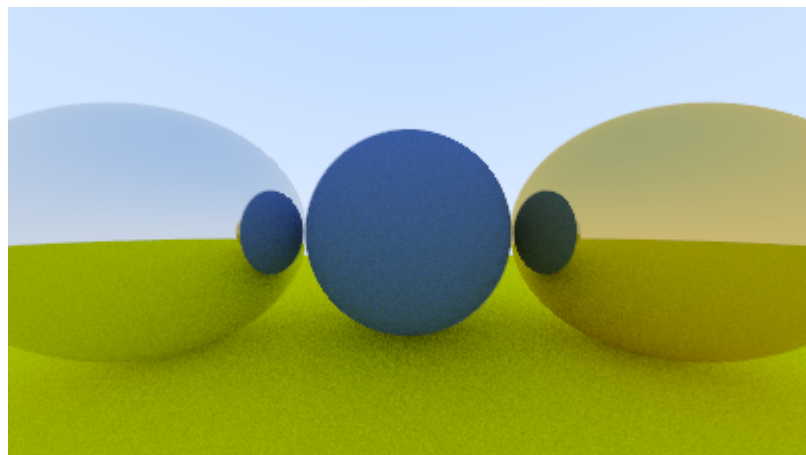

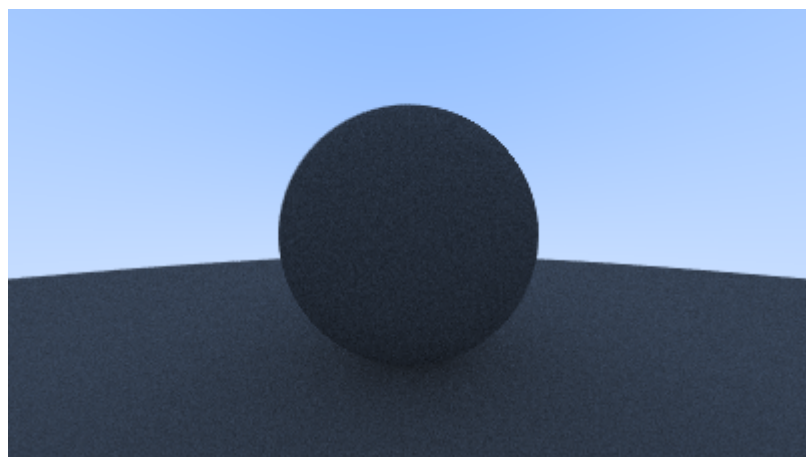

后续我尝试引入自己的图像，初步尝试绘制太阳系通过调整位置和背景得到了stars系列的照片（第十一个函数），得到最后的有明显阴影的照片

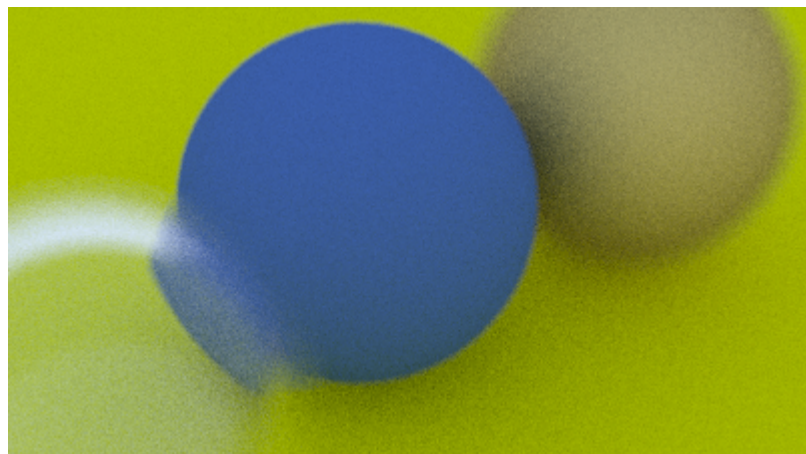

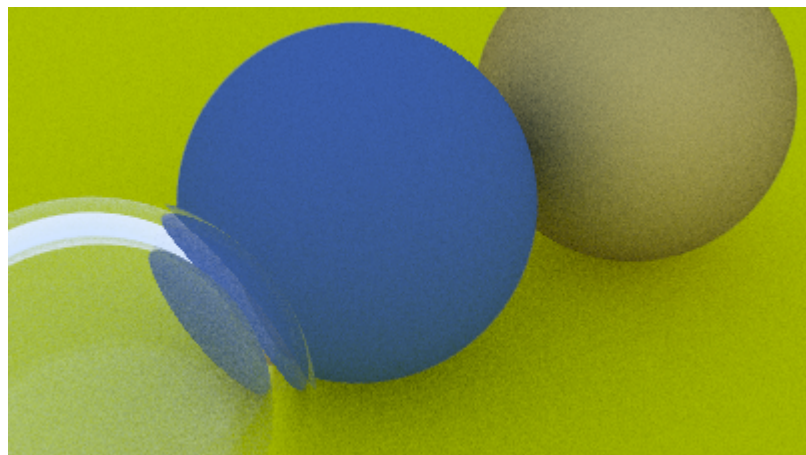

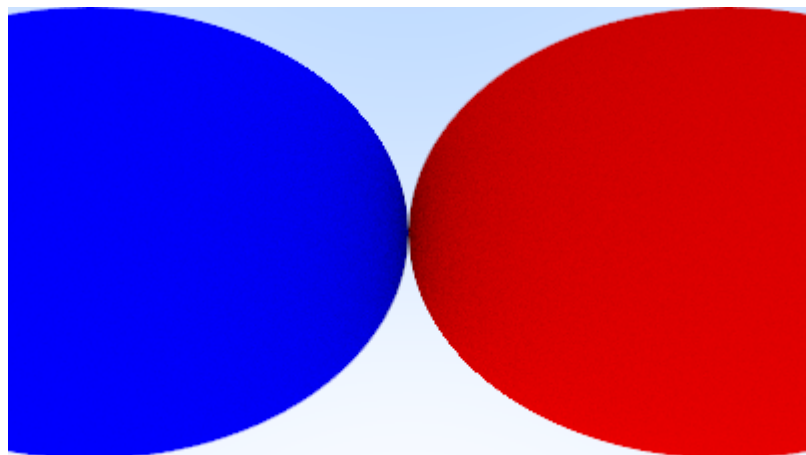

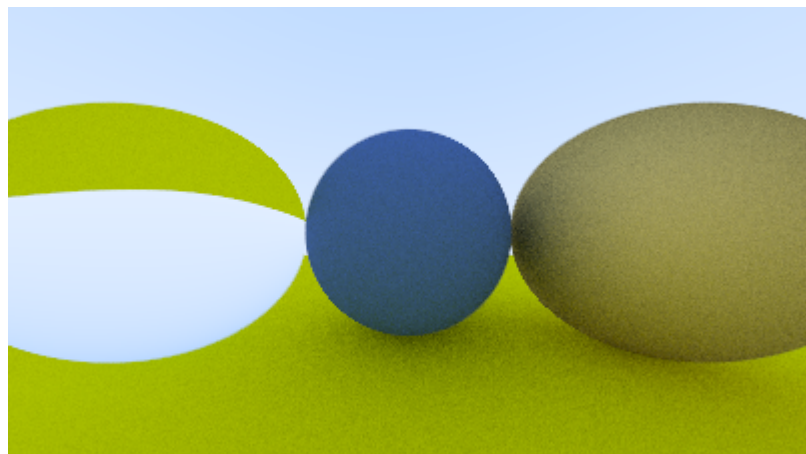

随后我尝试了多种的组转得到不同的图，就是在11及其之后，以及后续我也会不断更新我产生的新图和代码。同时我初步完成了三角形但是不知道具体效果以及obj库尝试创作，但是没有形成完整的功能。

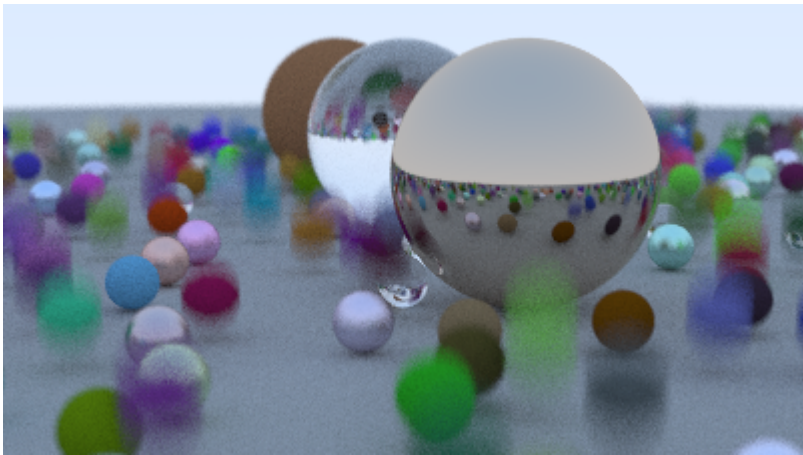

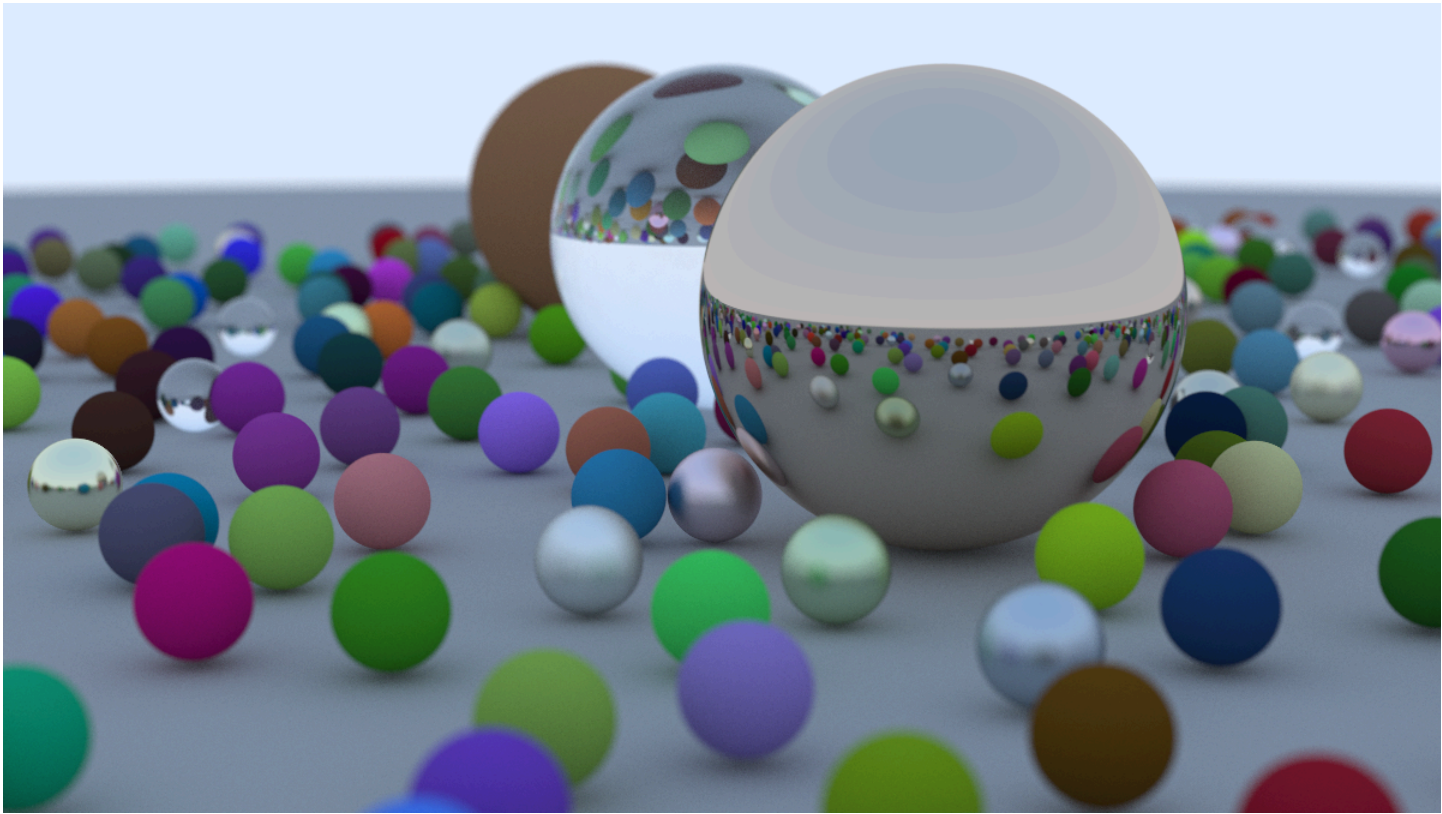

同时，我额外设立了convert_all_ppm.py可以将目录下的ppm文件转化为png图片并且储存到converted_pngs文件夹。

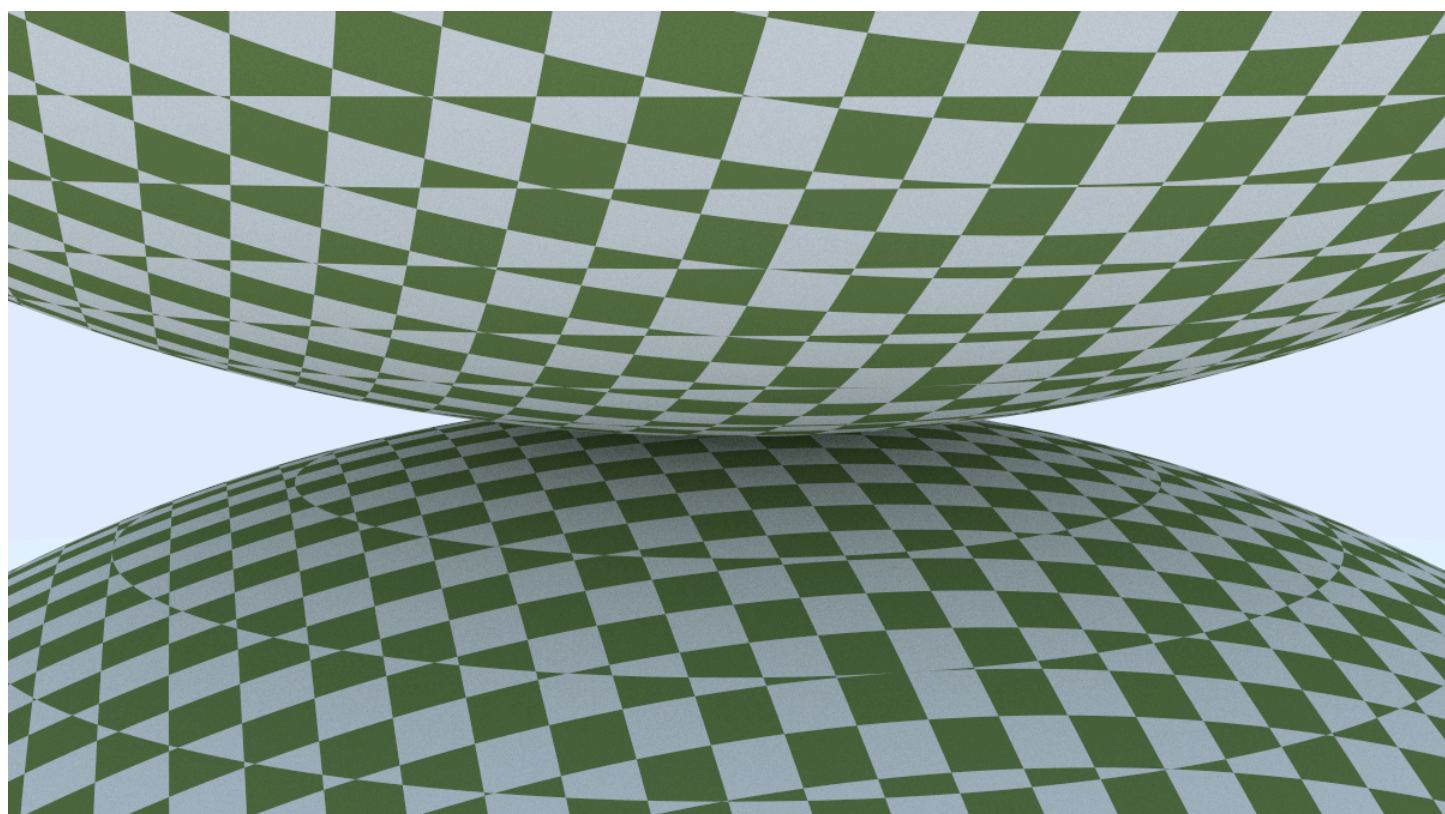

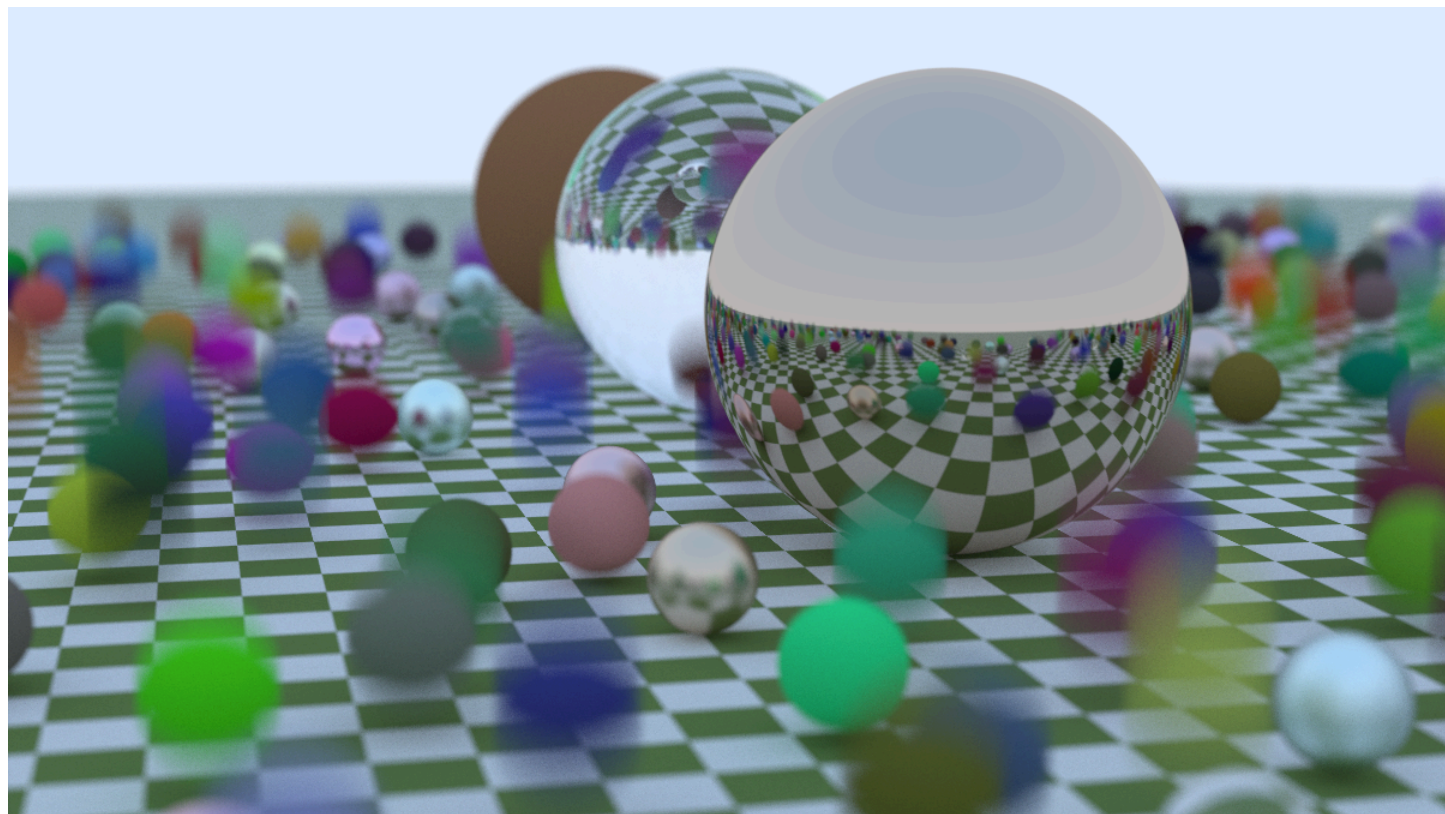

下面是我从开始到结束生成的图片的汇总

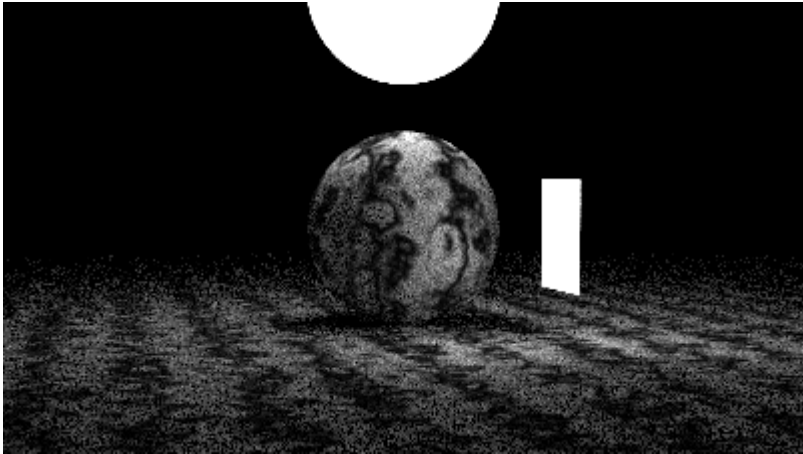

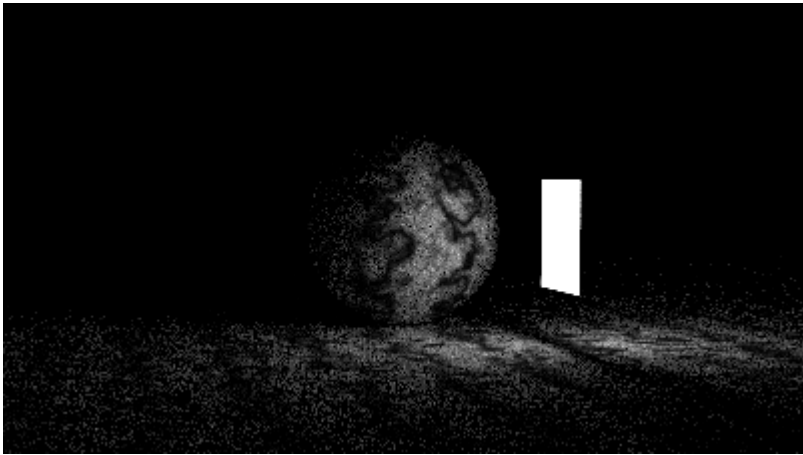

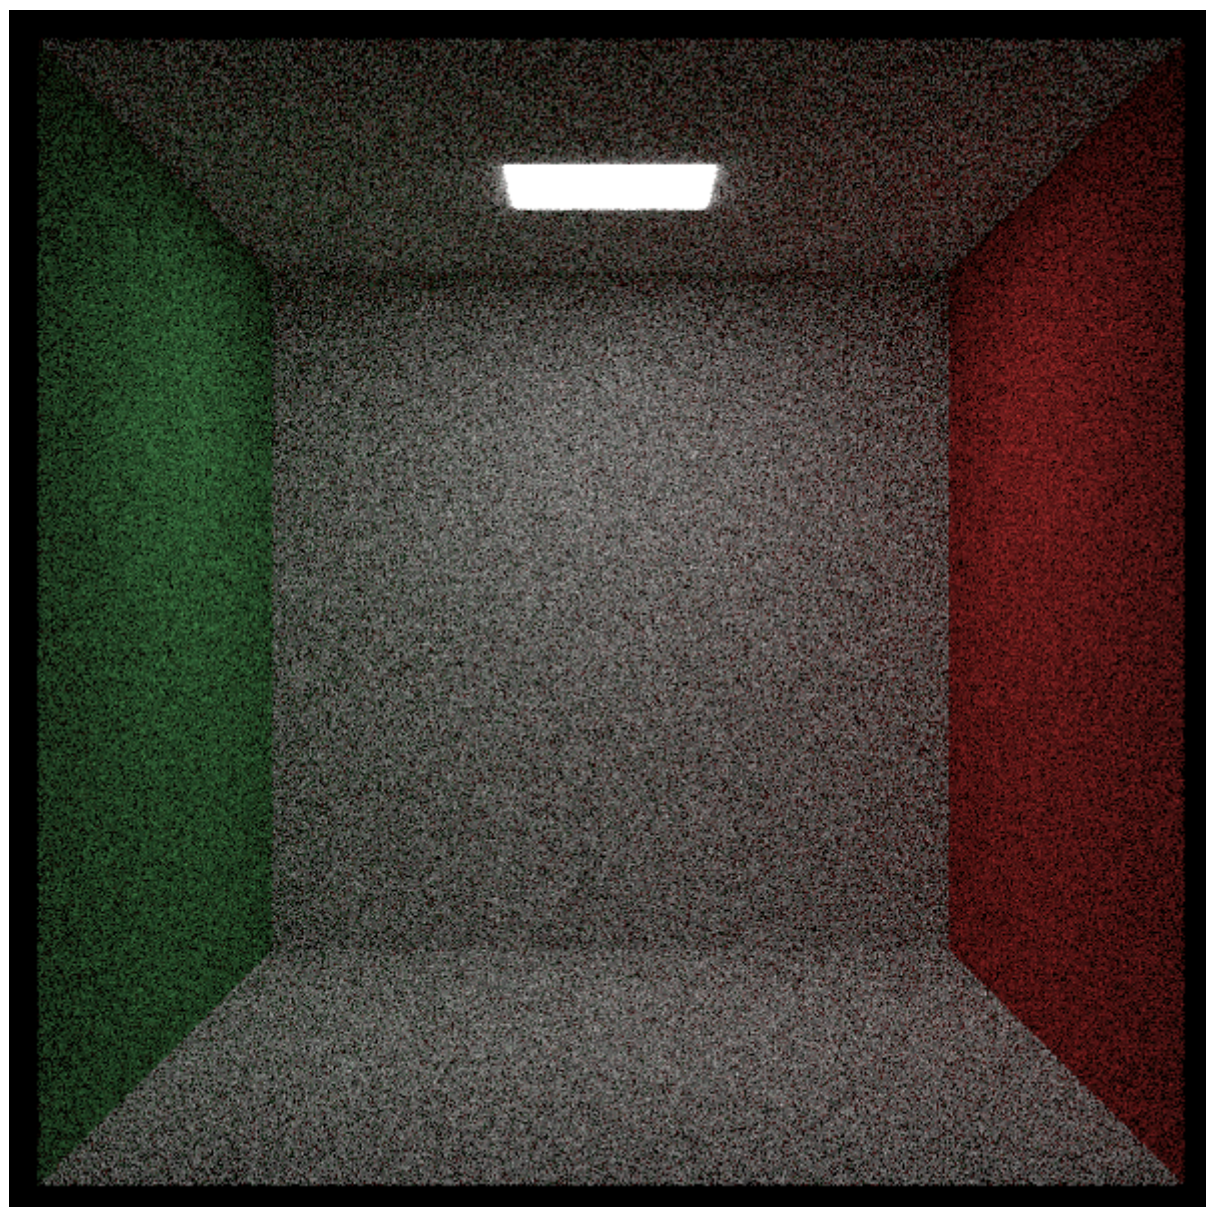

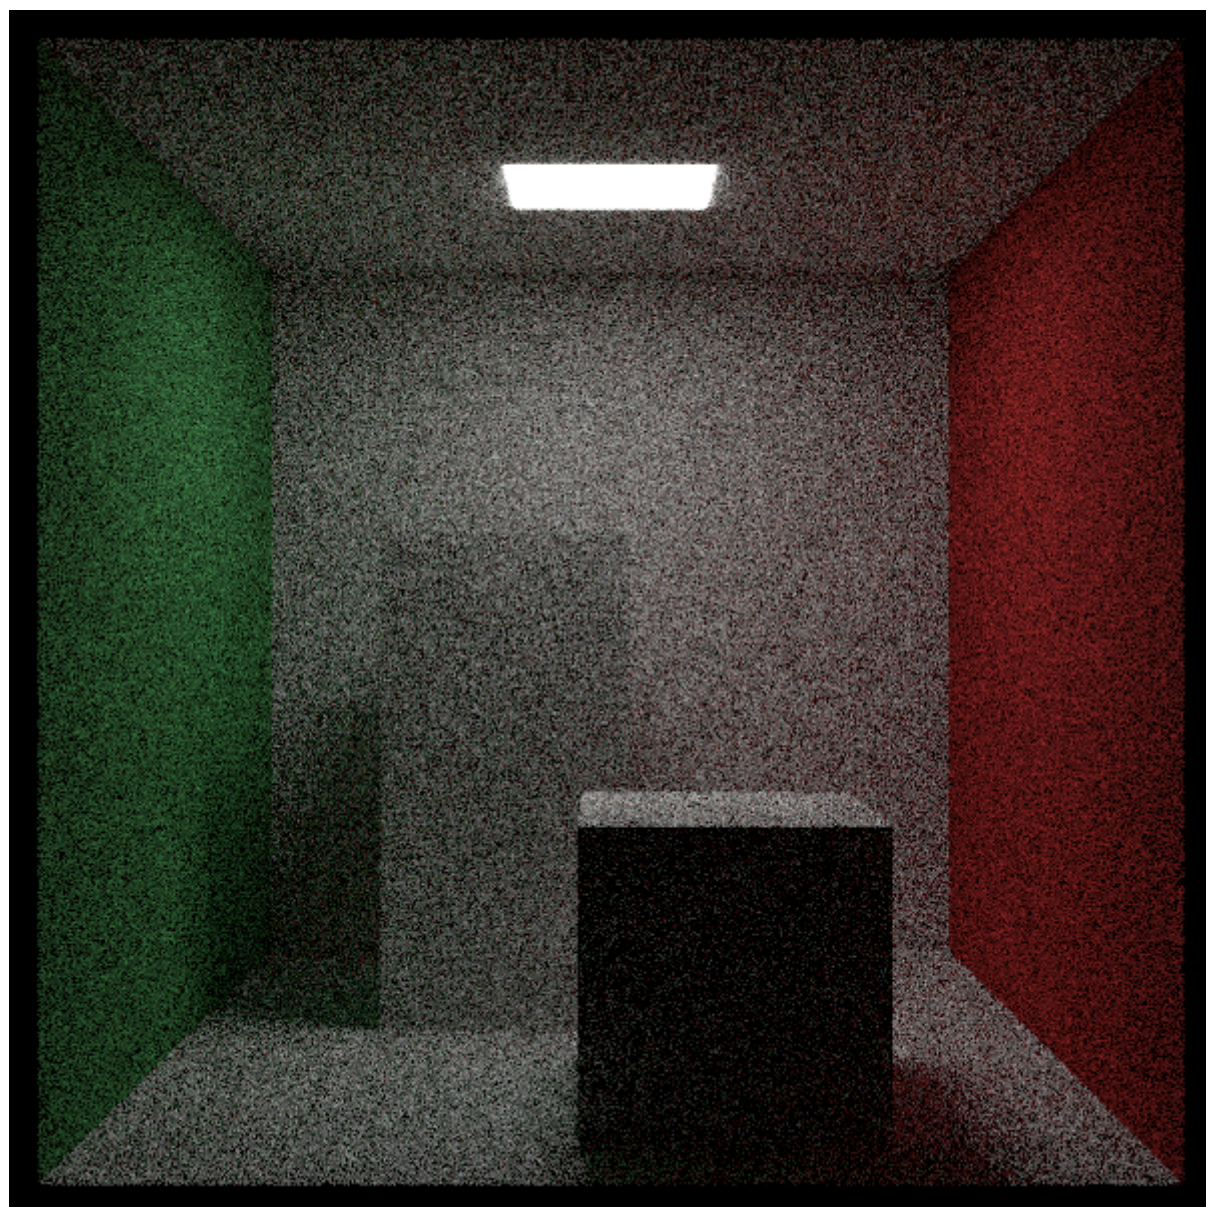

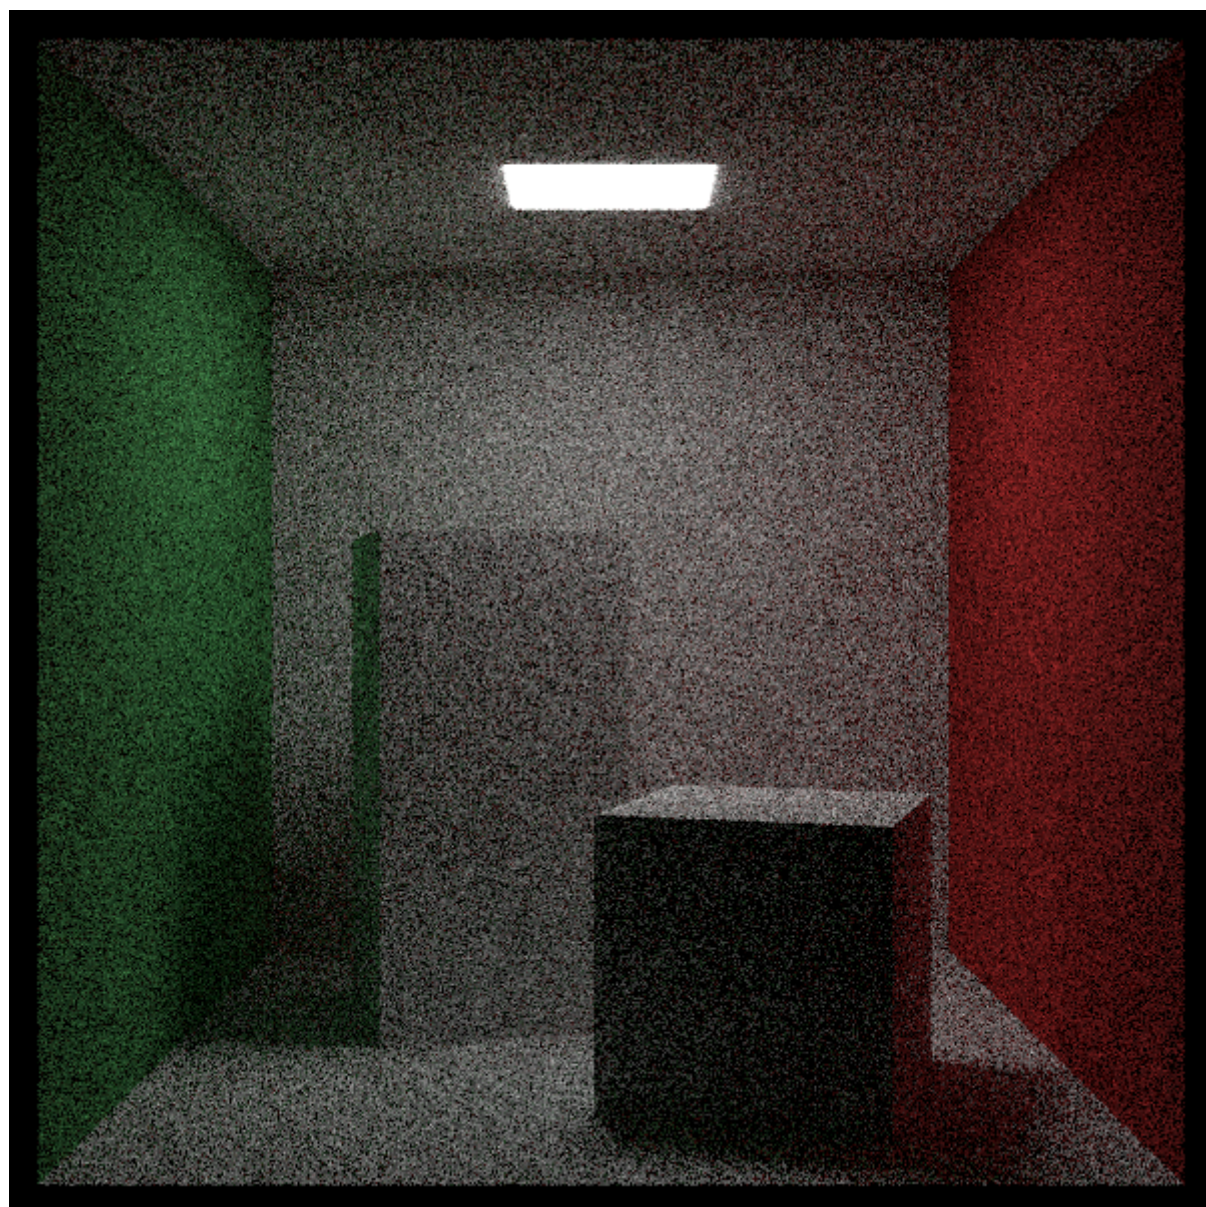

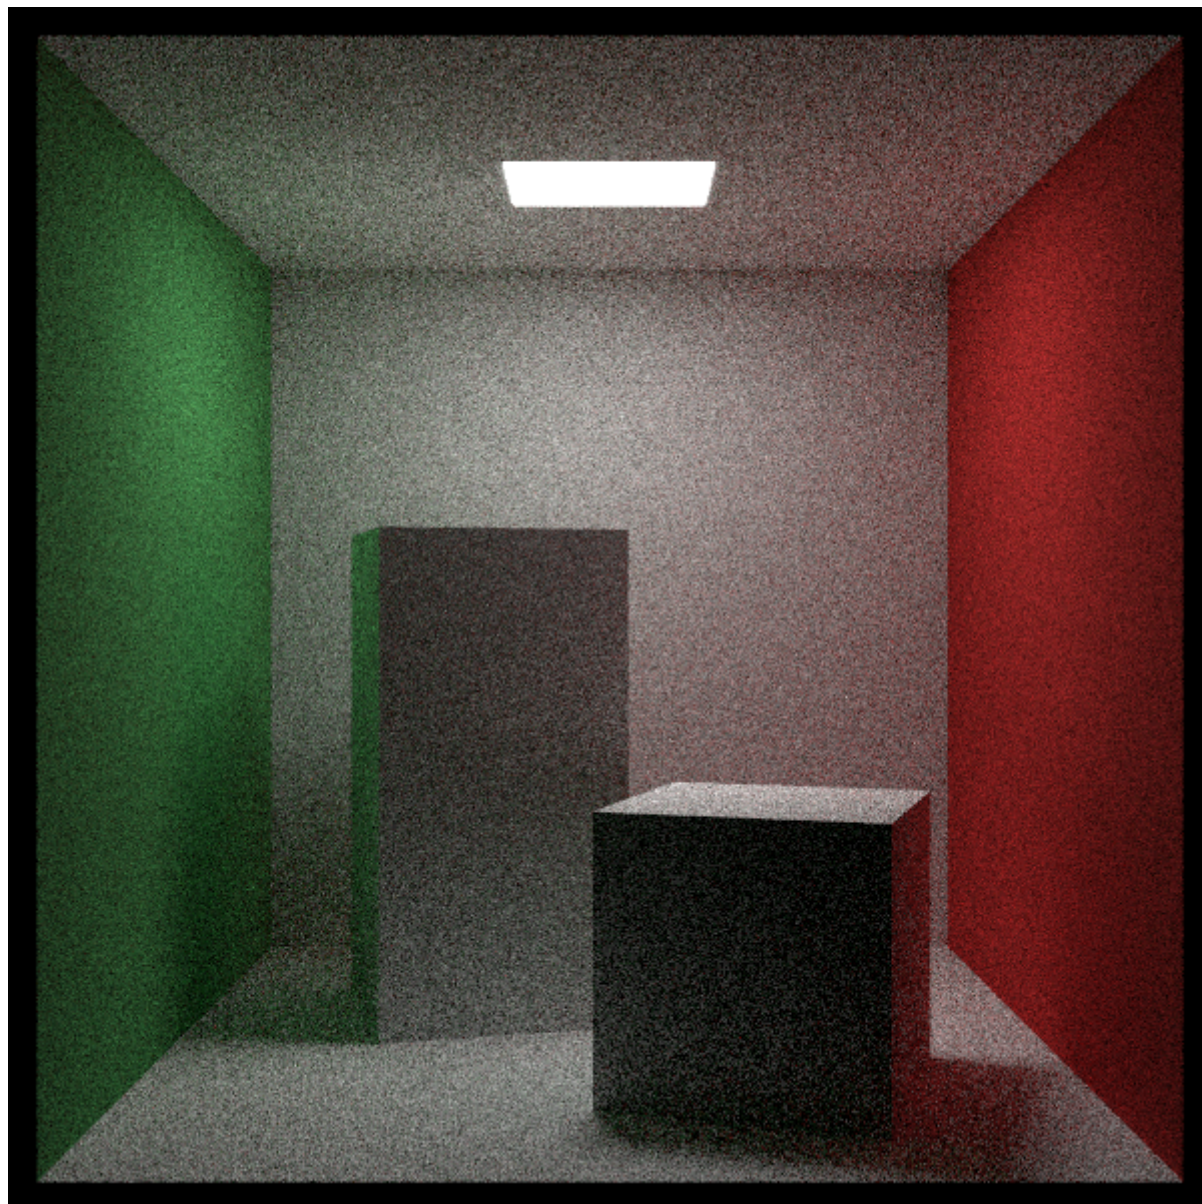

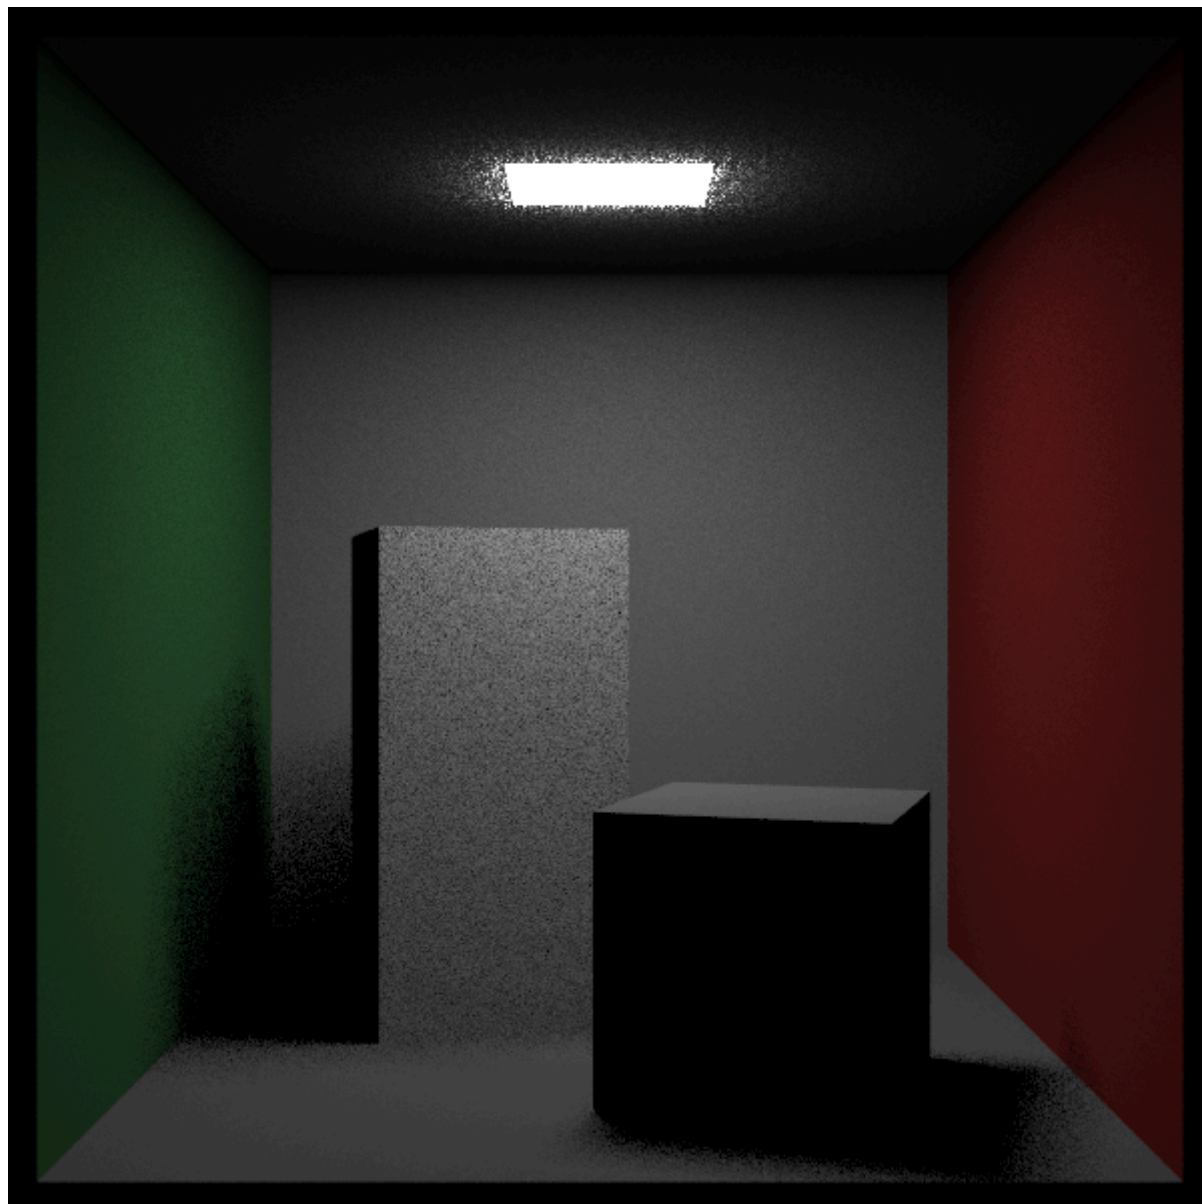

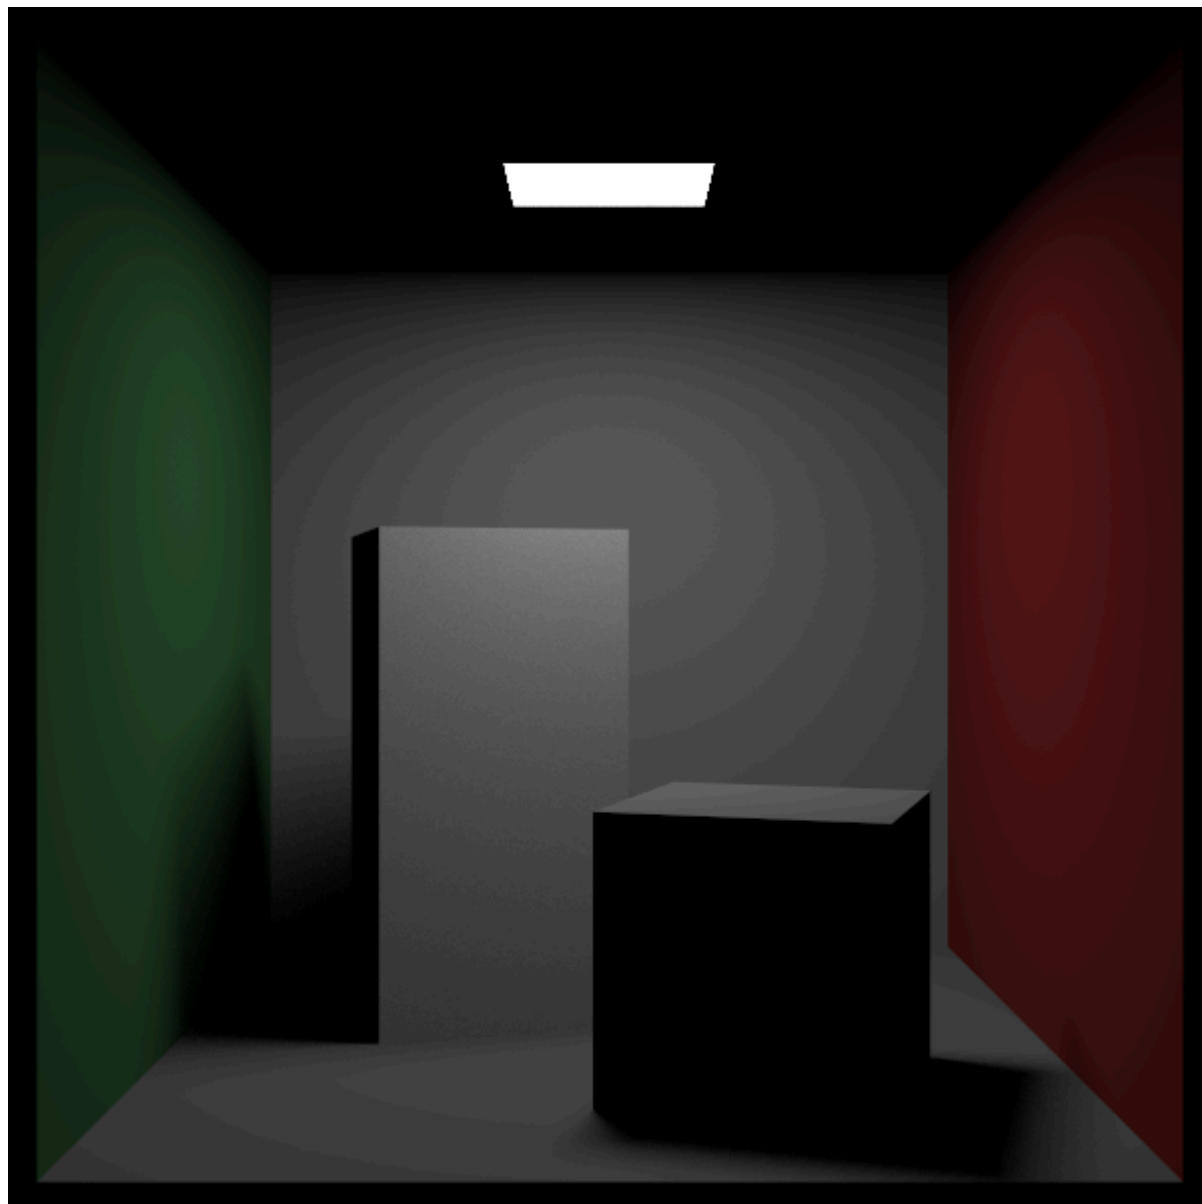

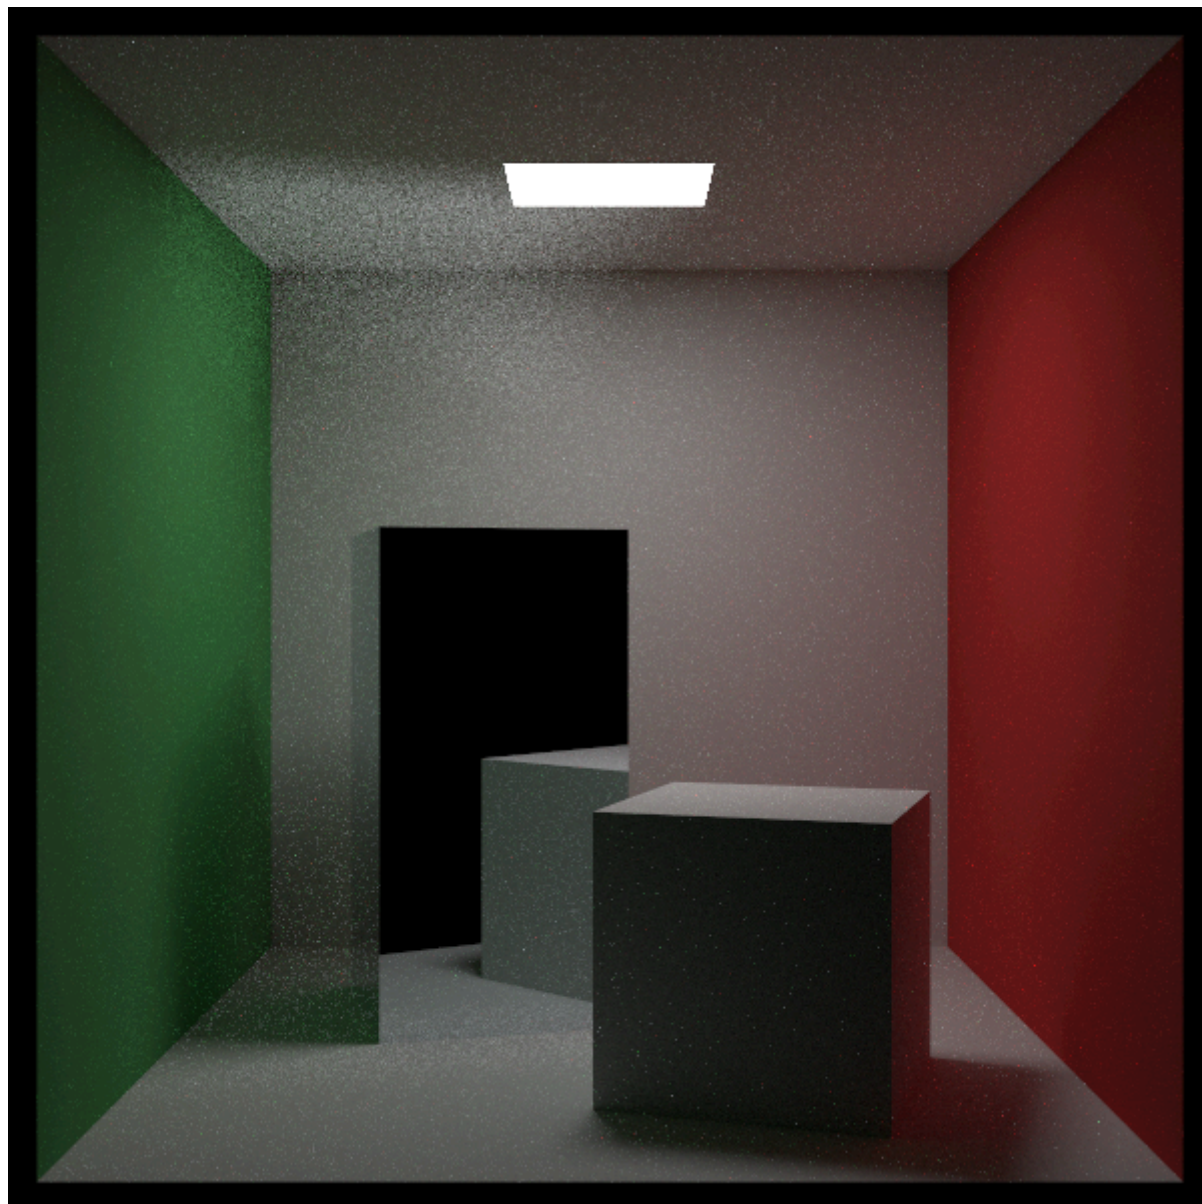

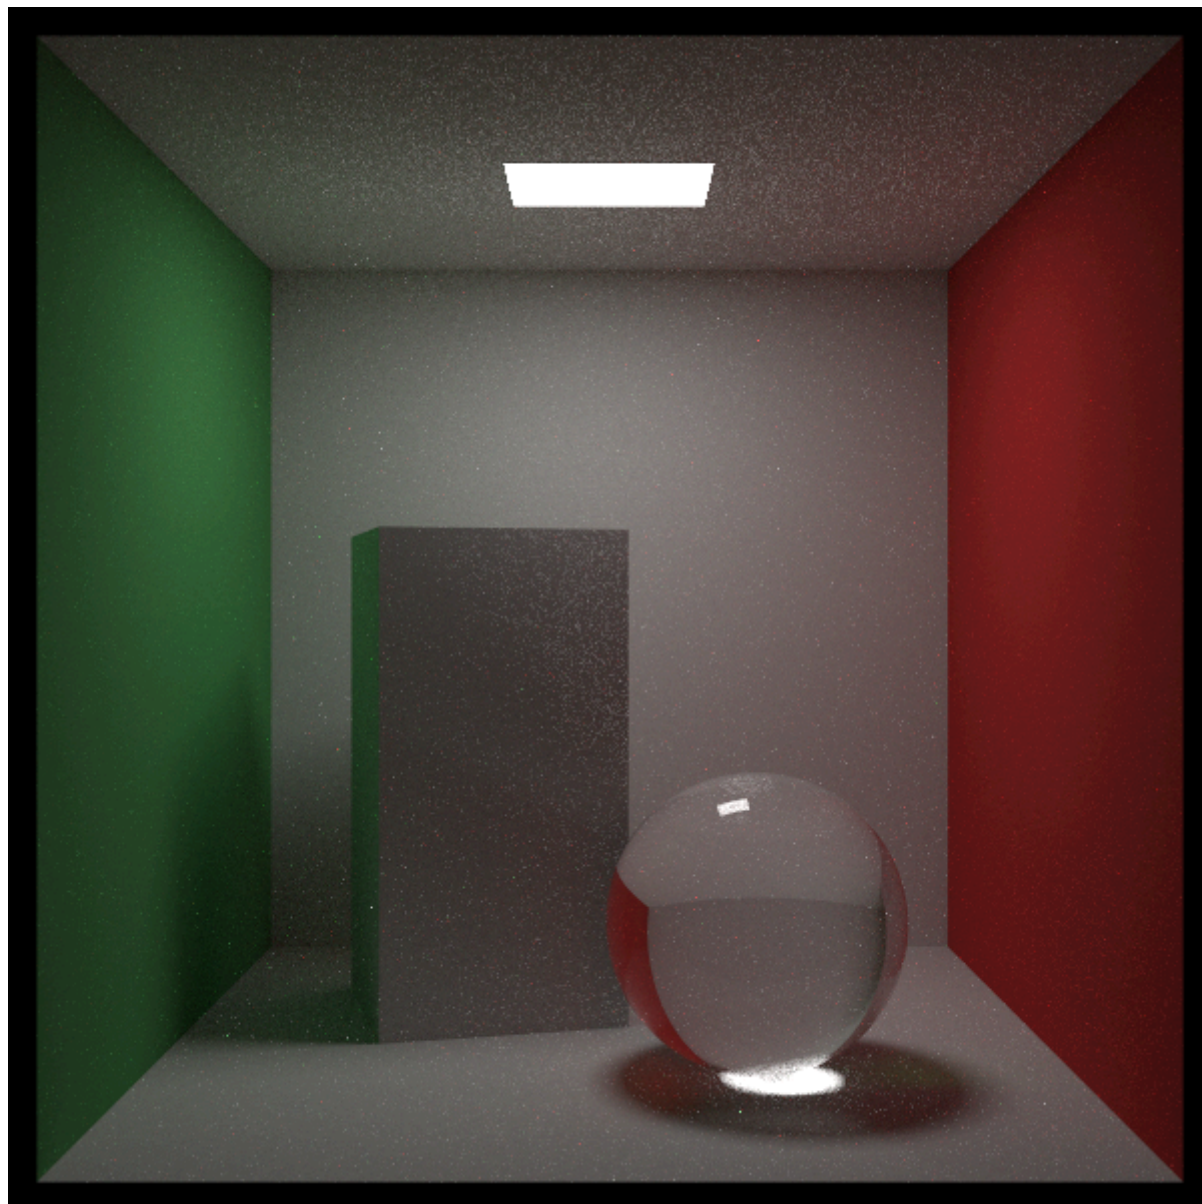

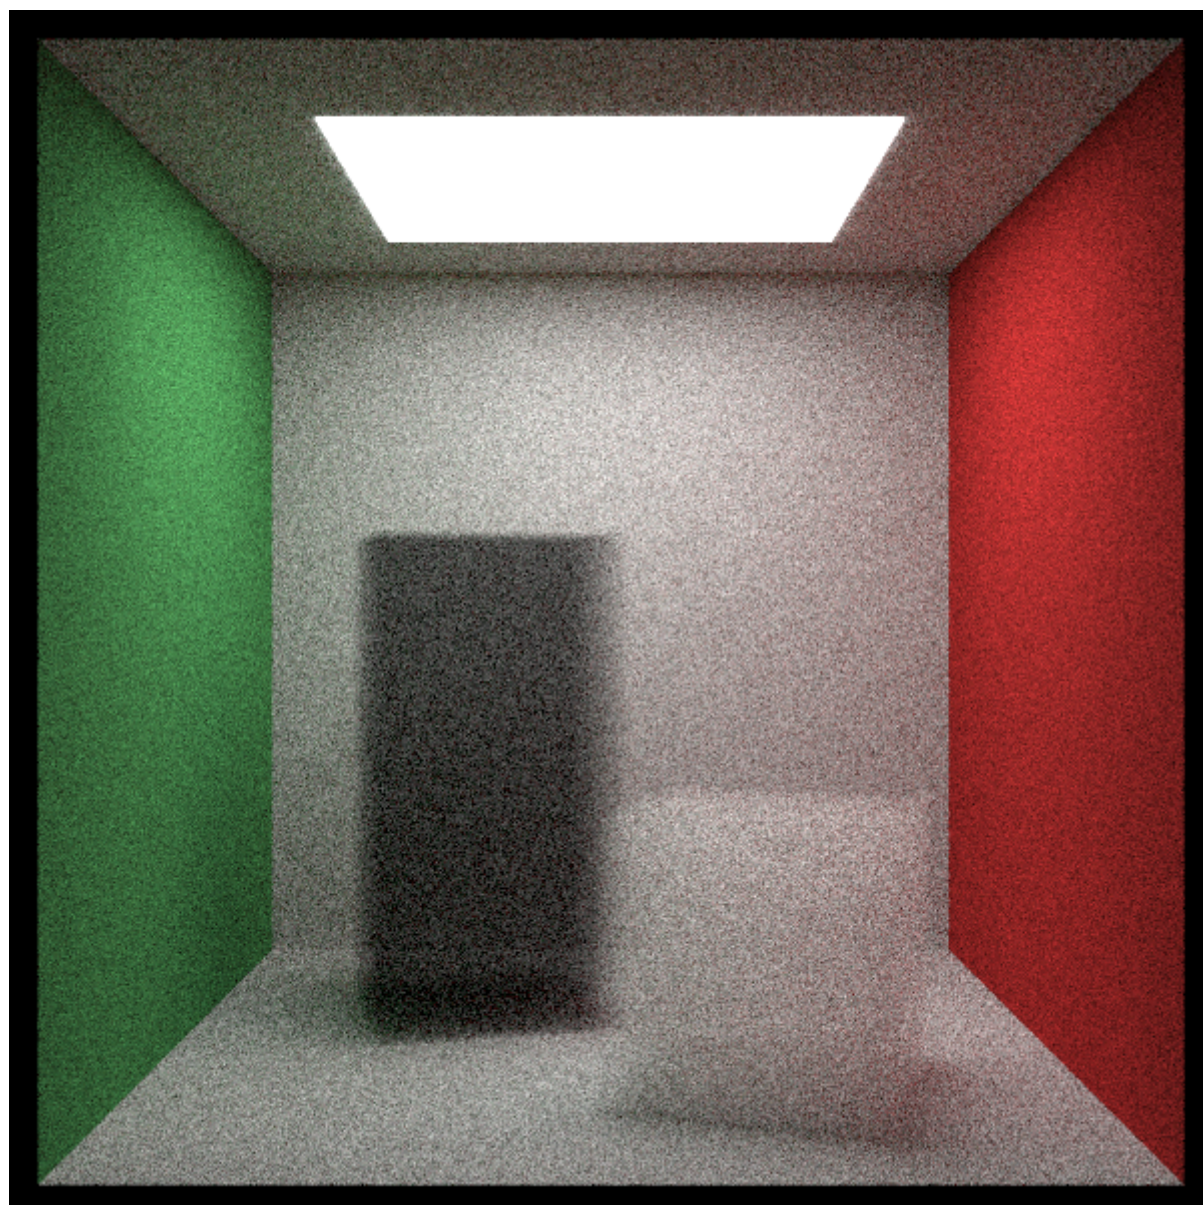

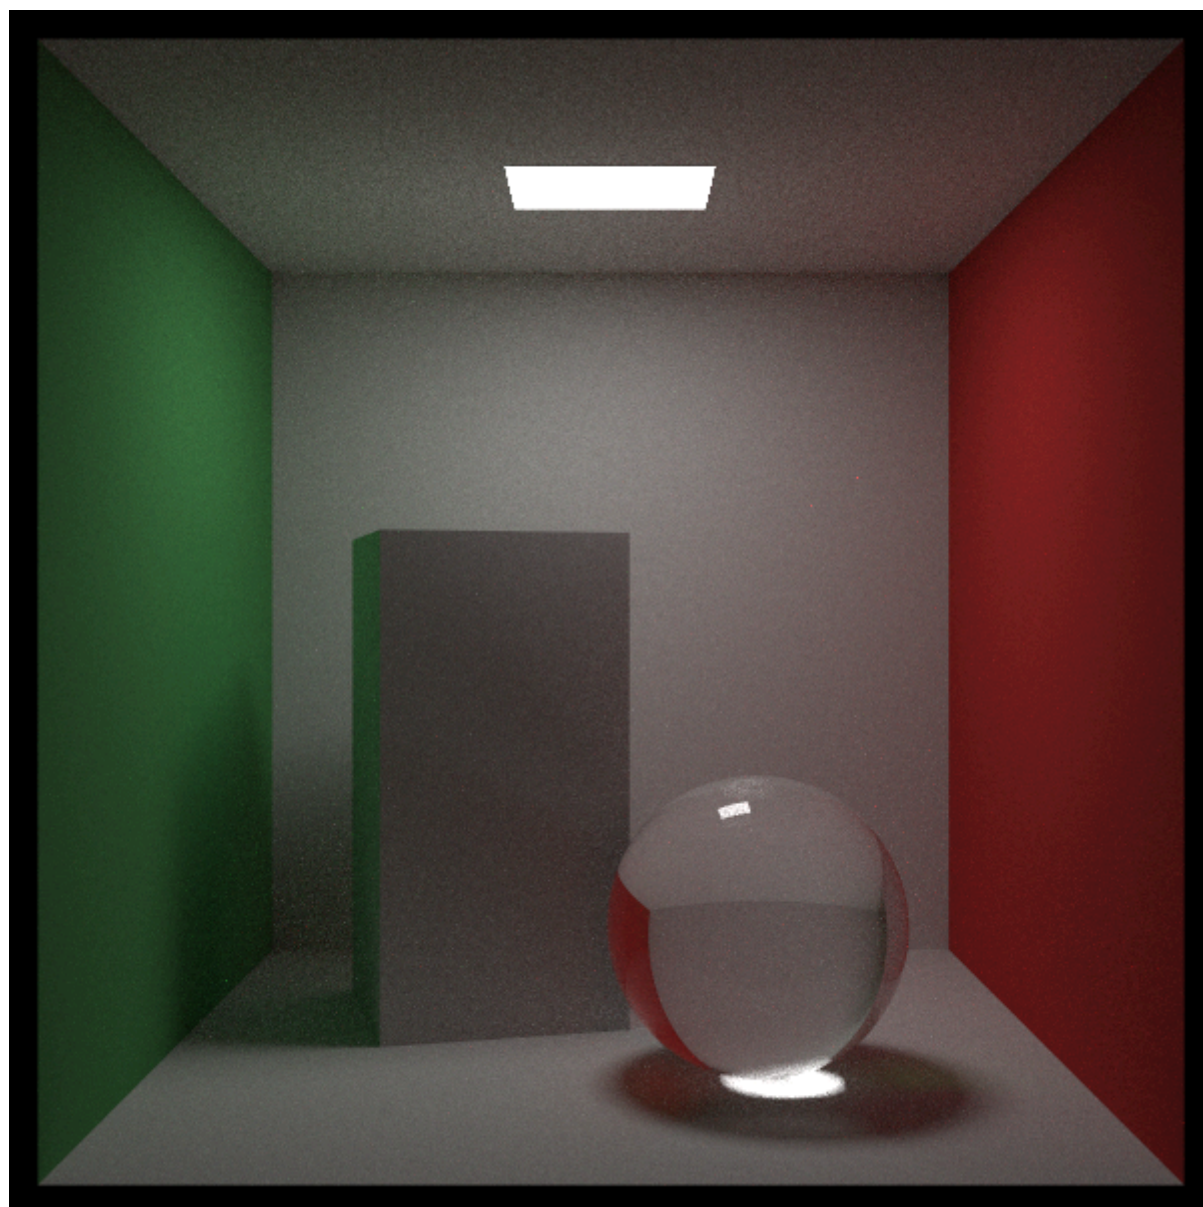

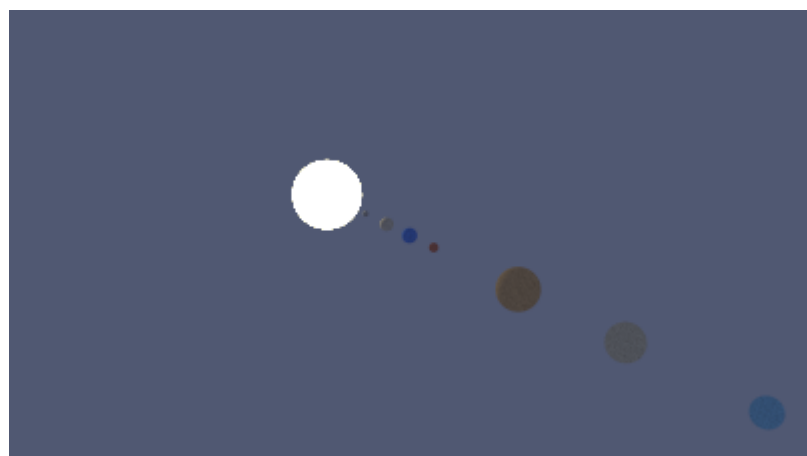

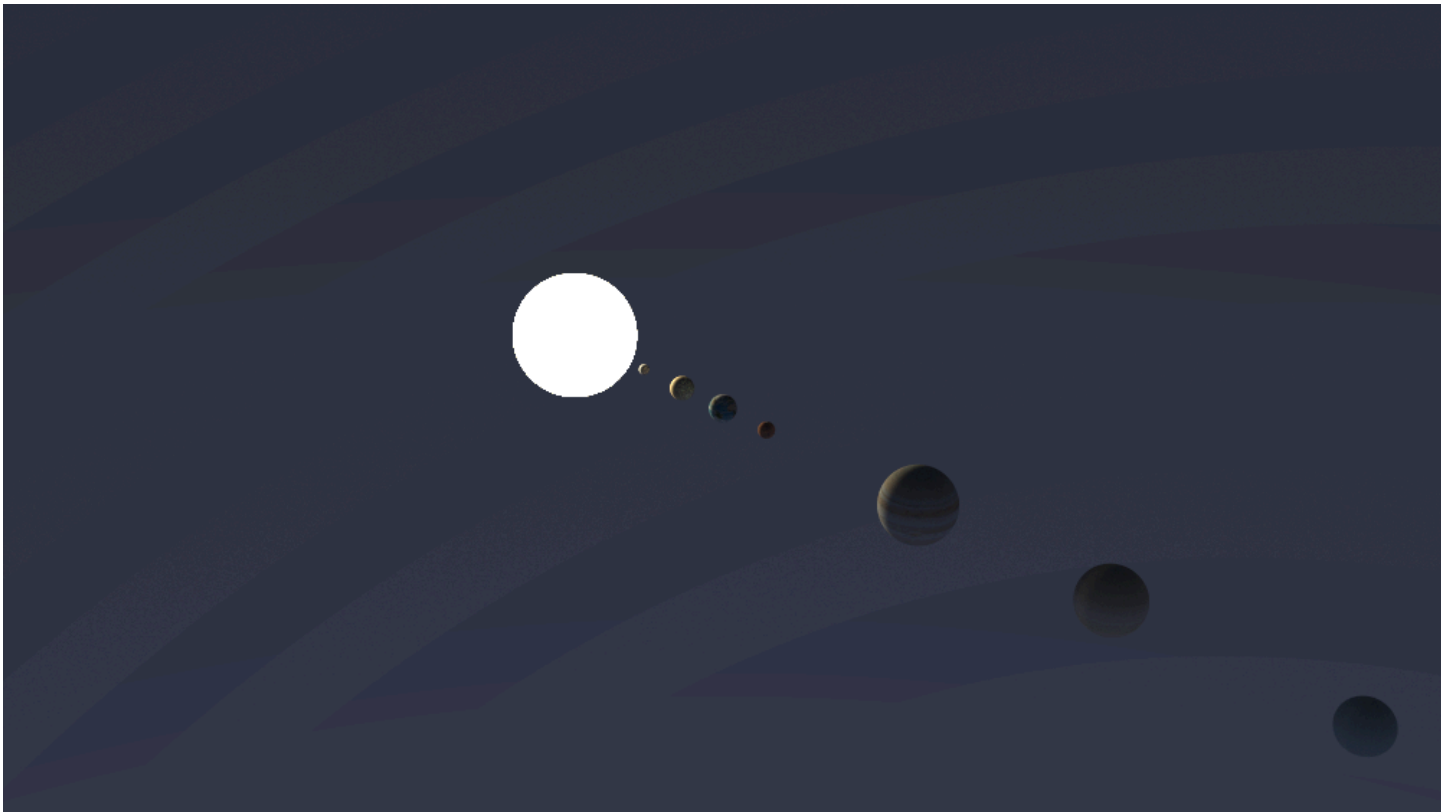

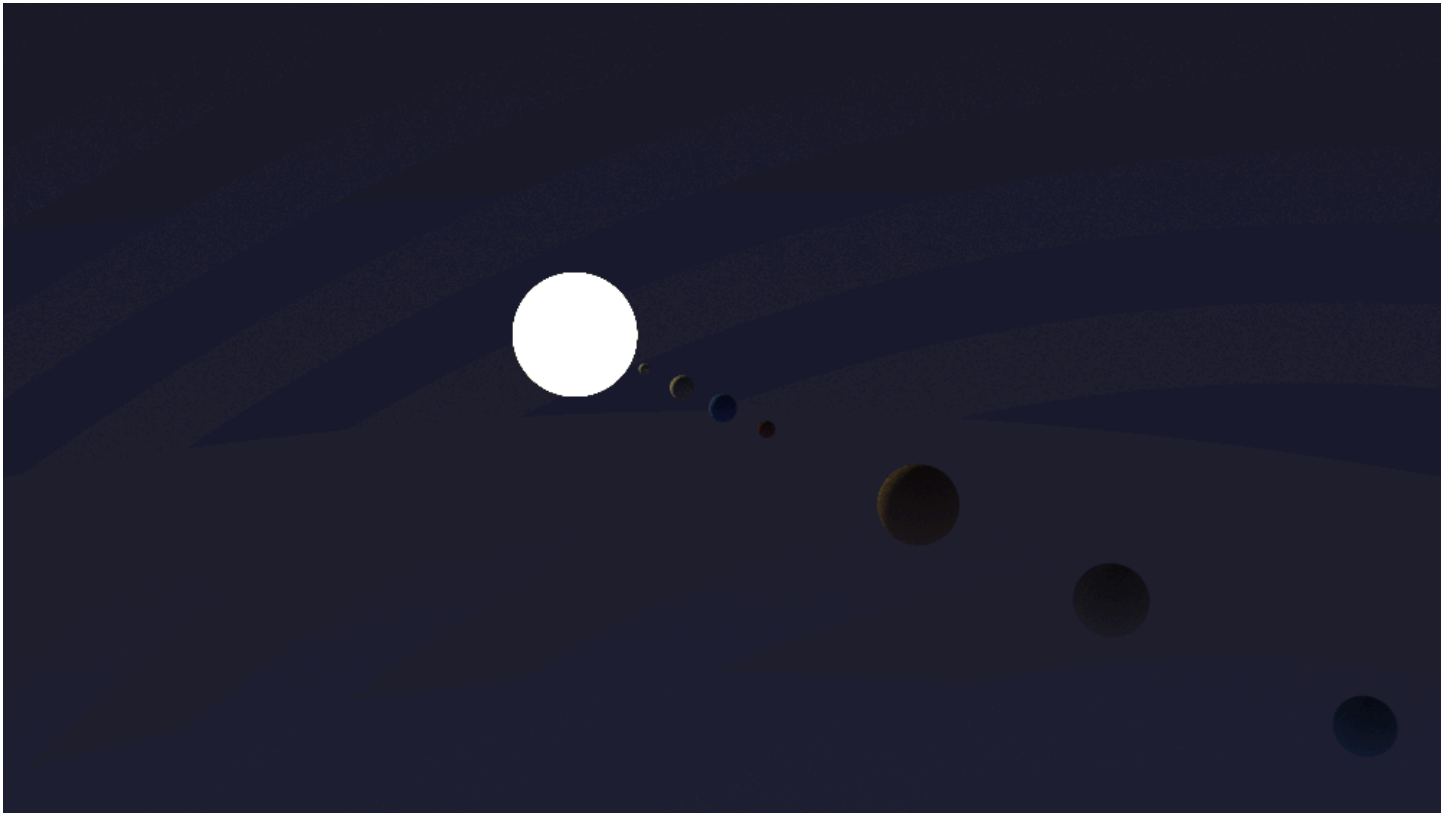

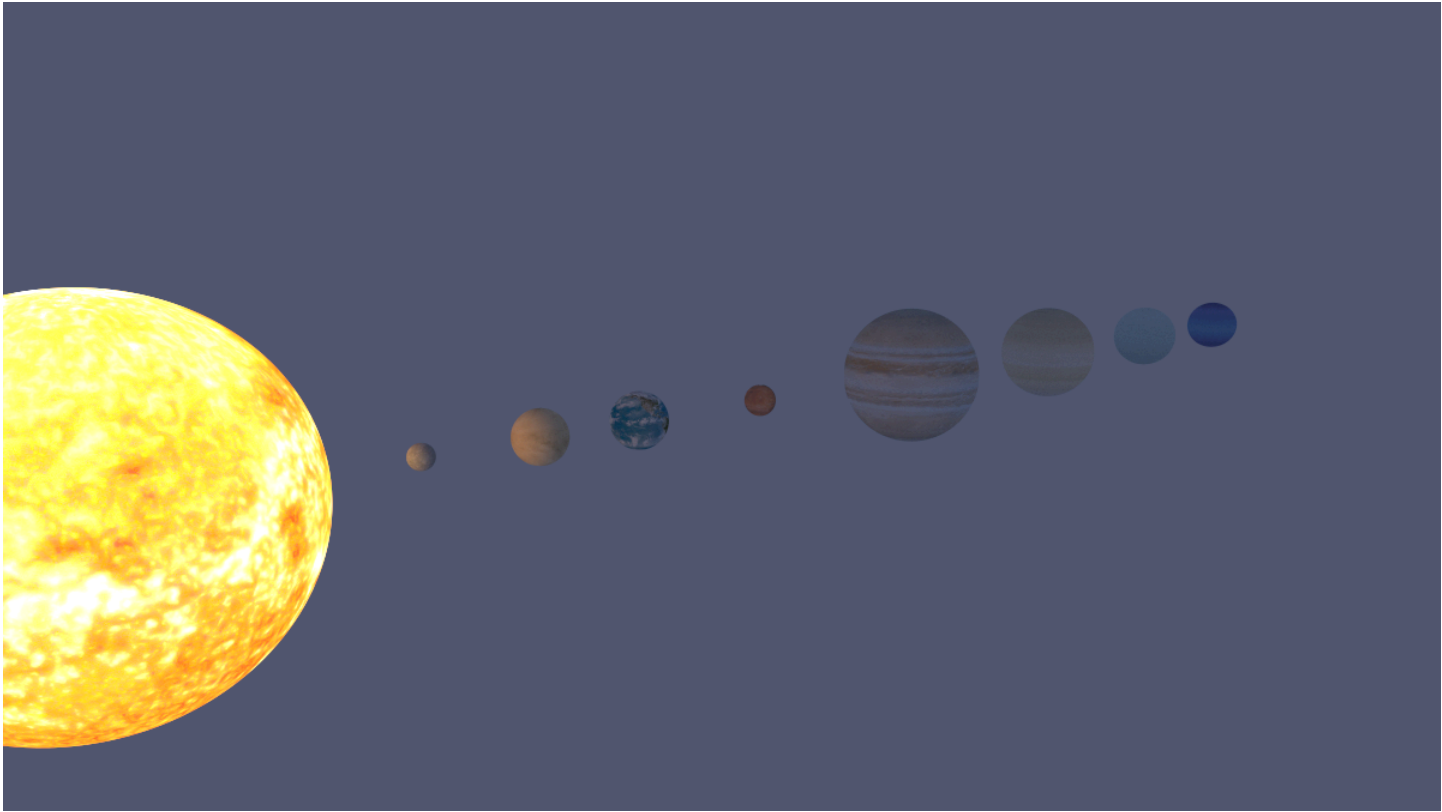

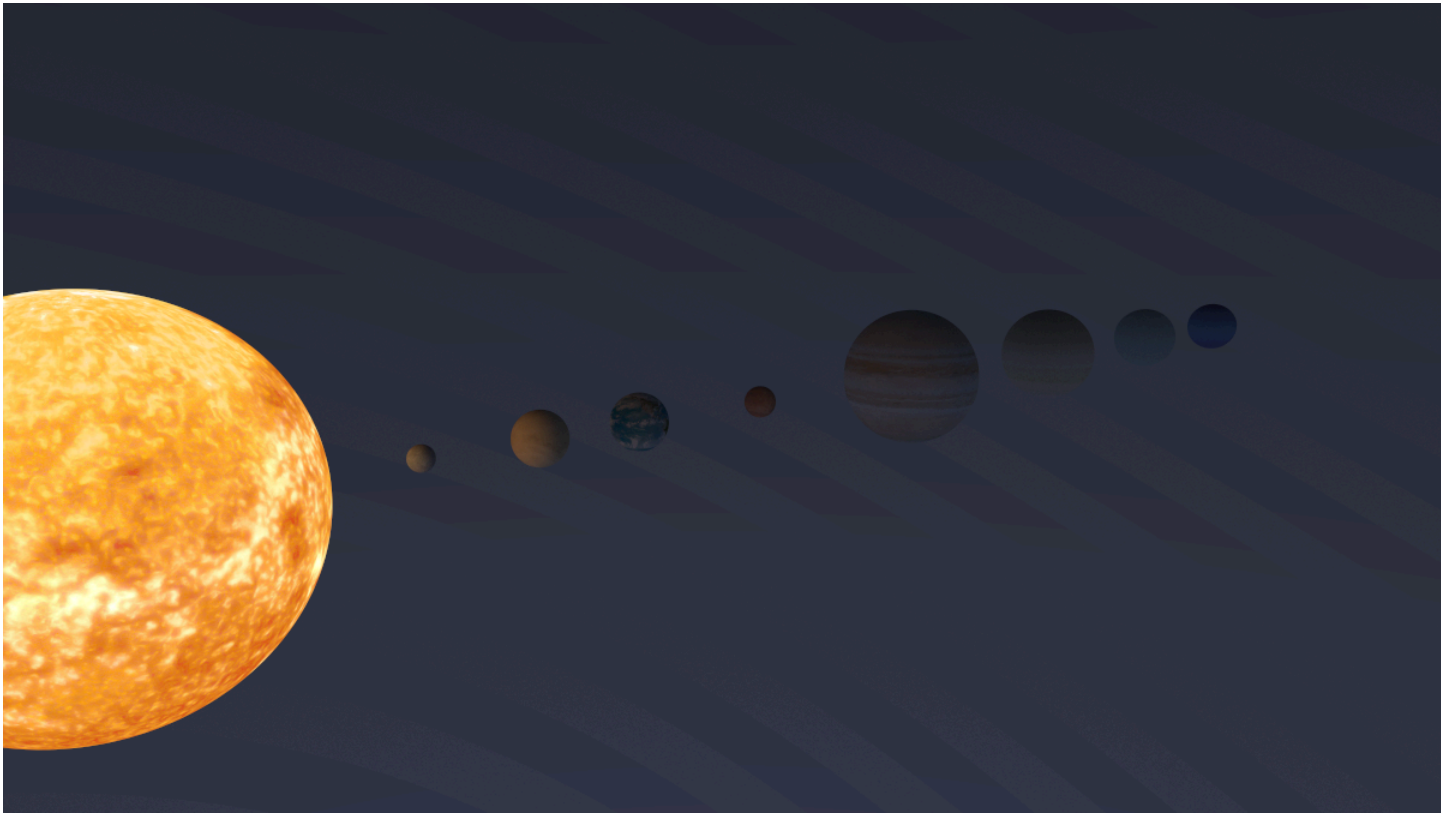

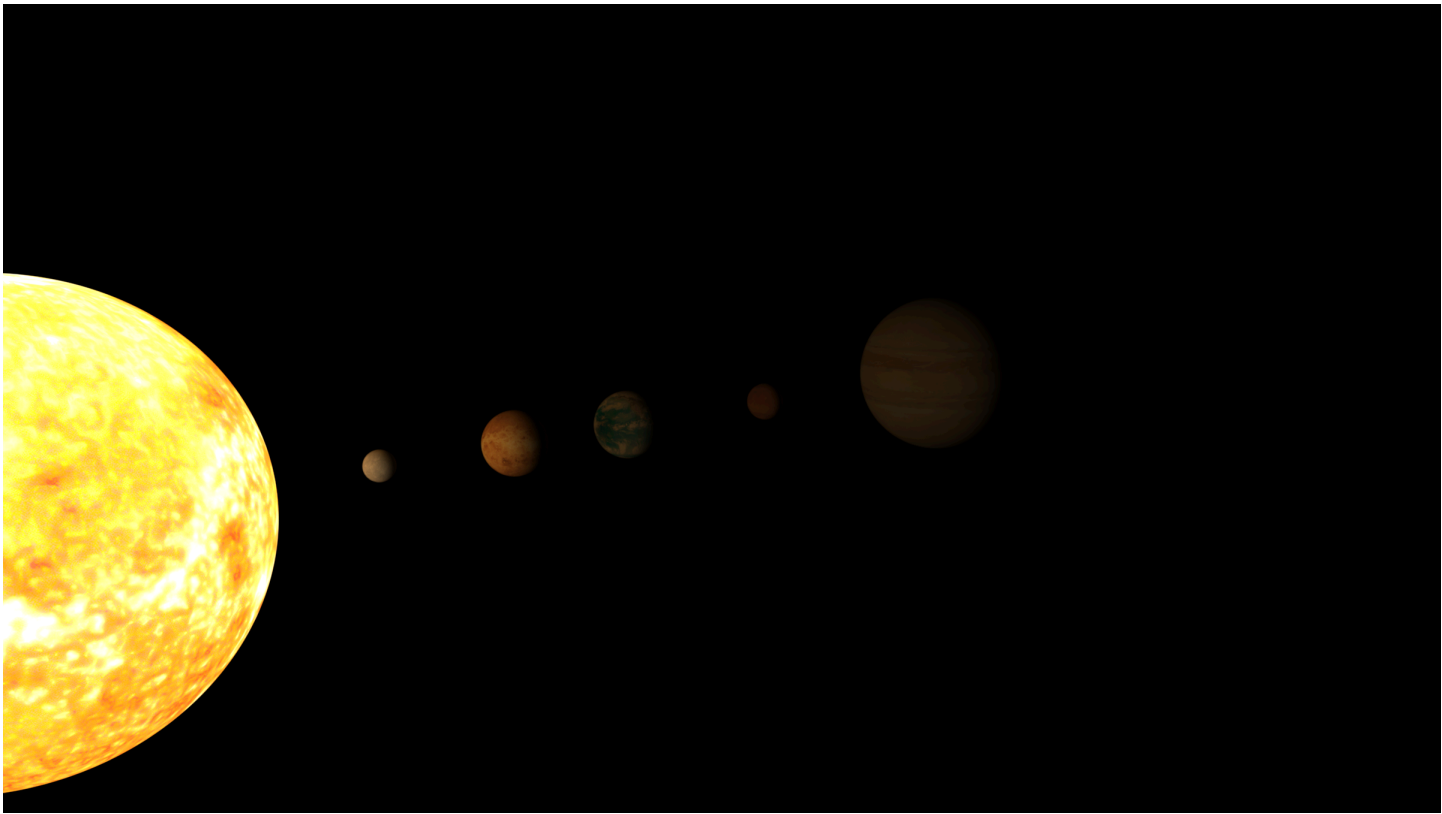

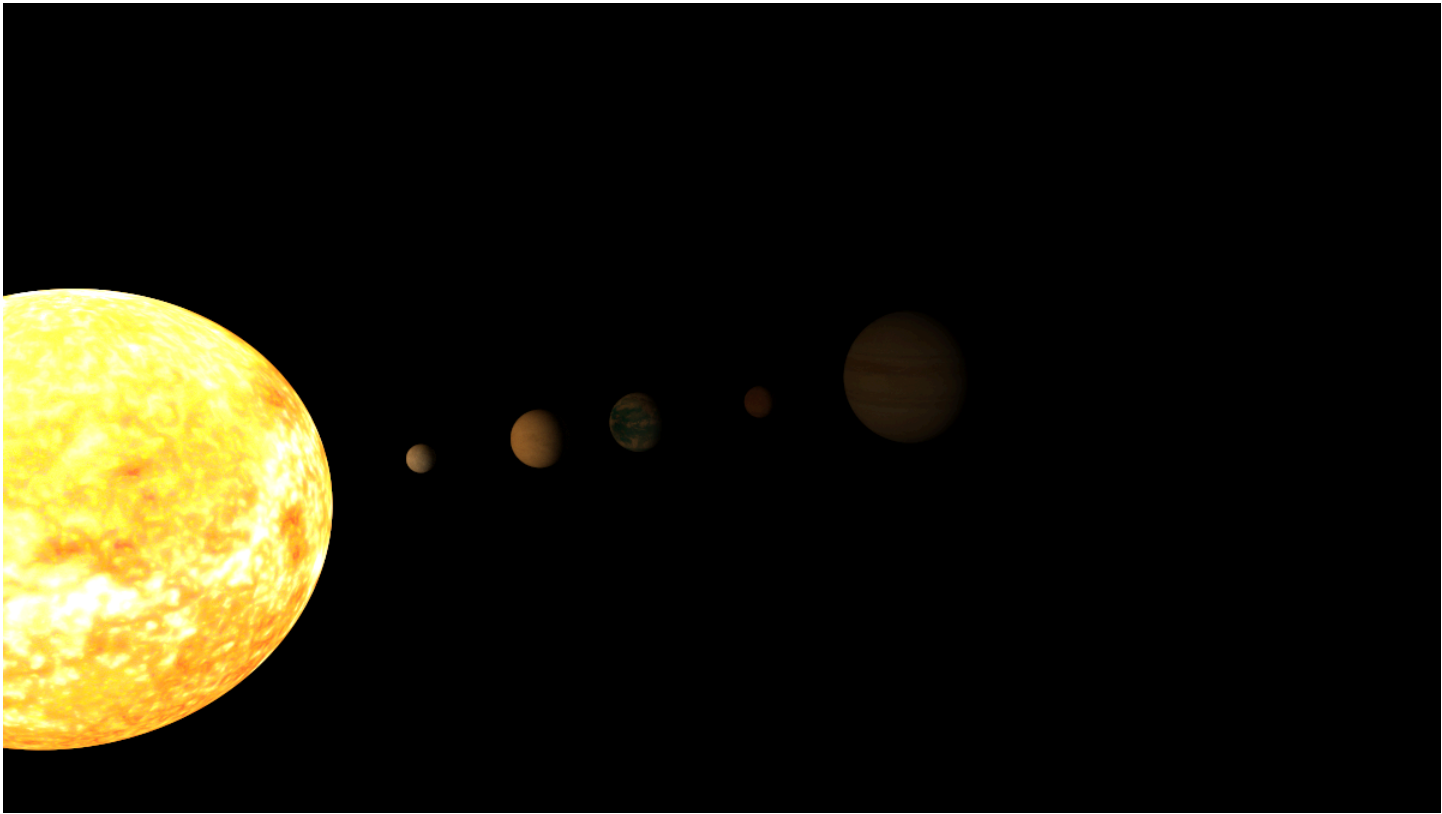

自己的创作:

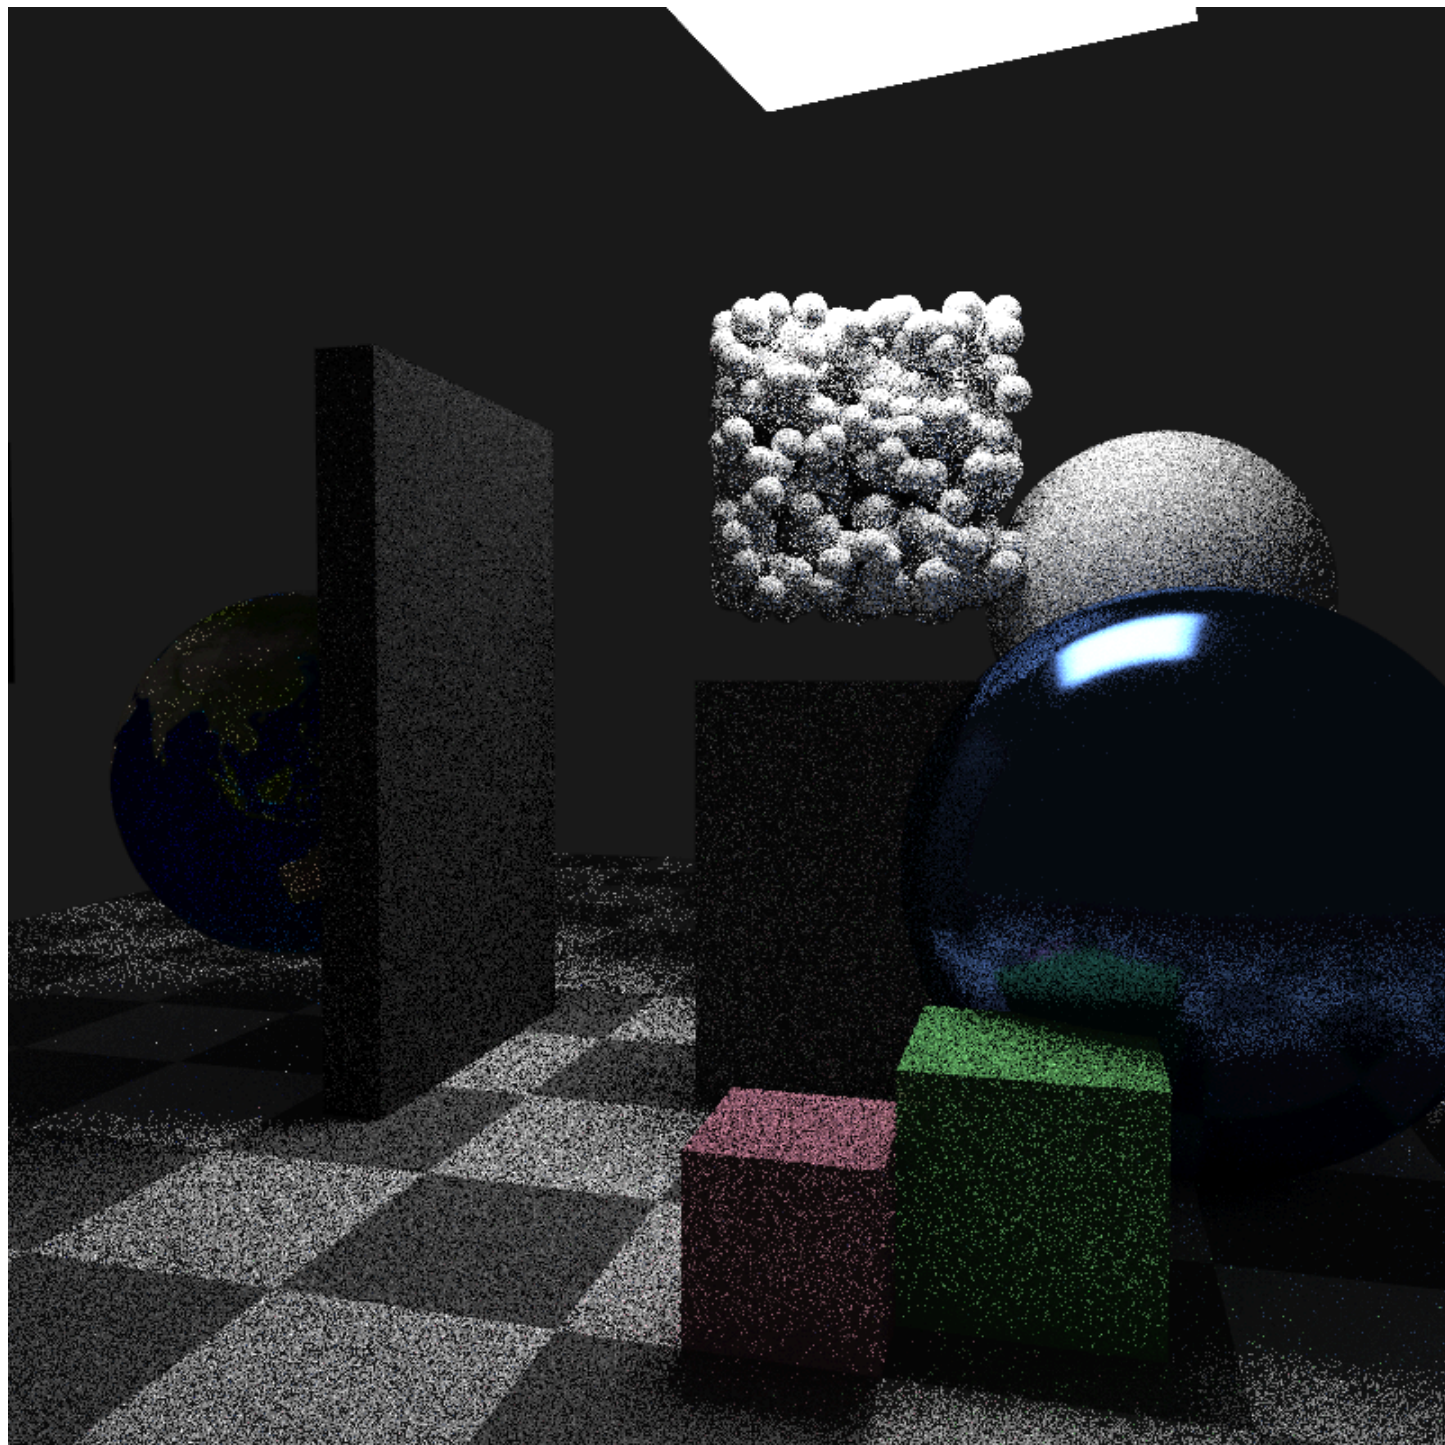

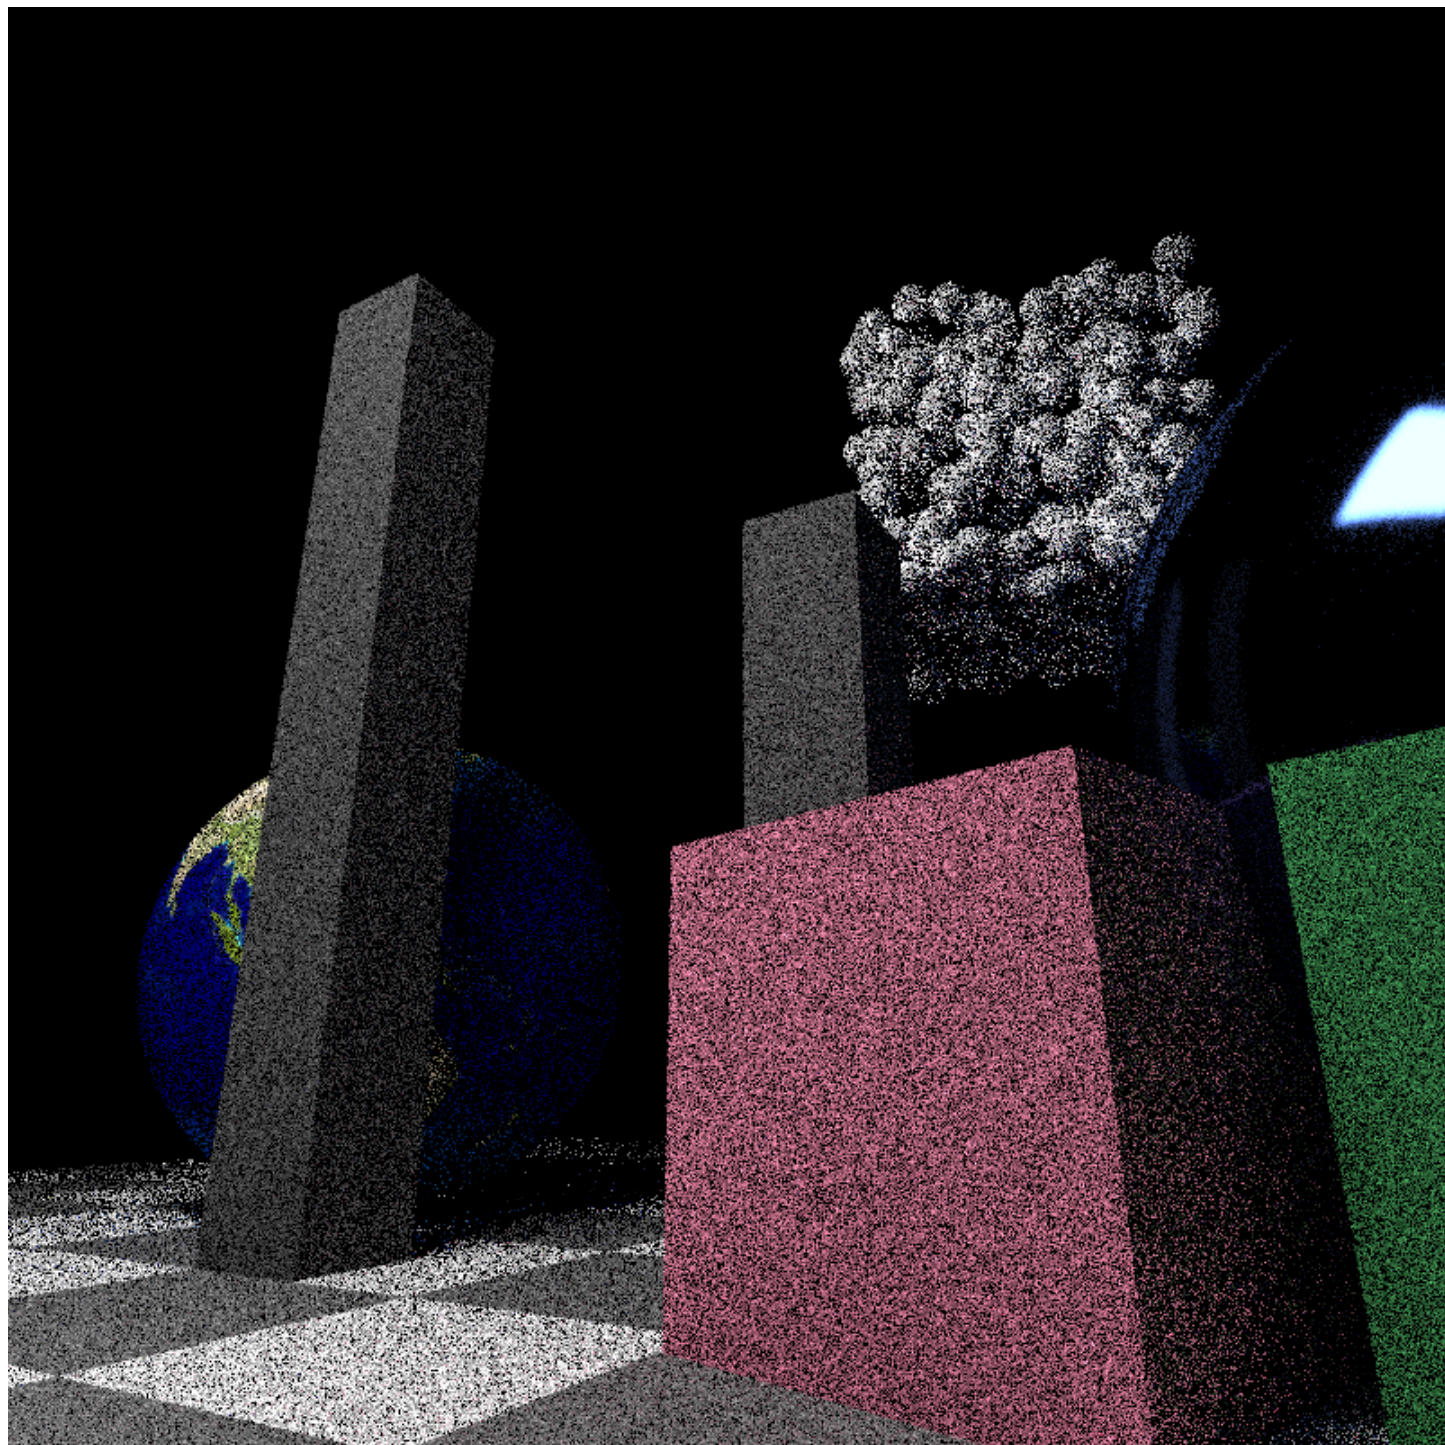

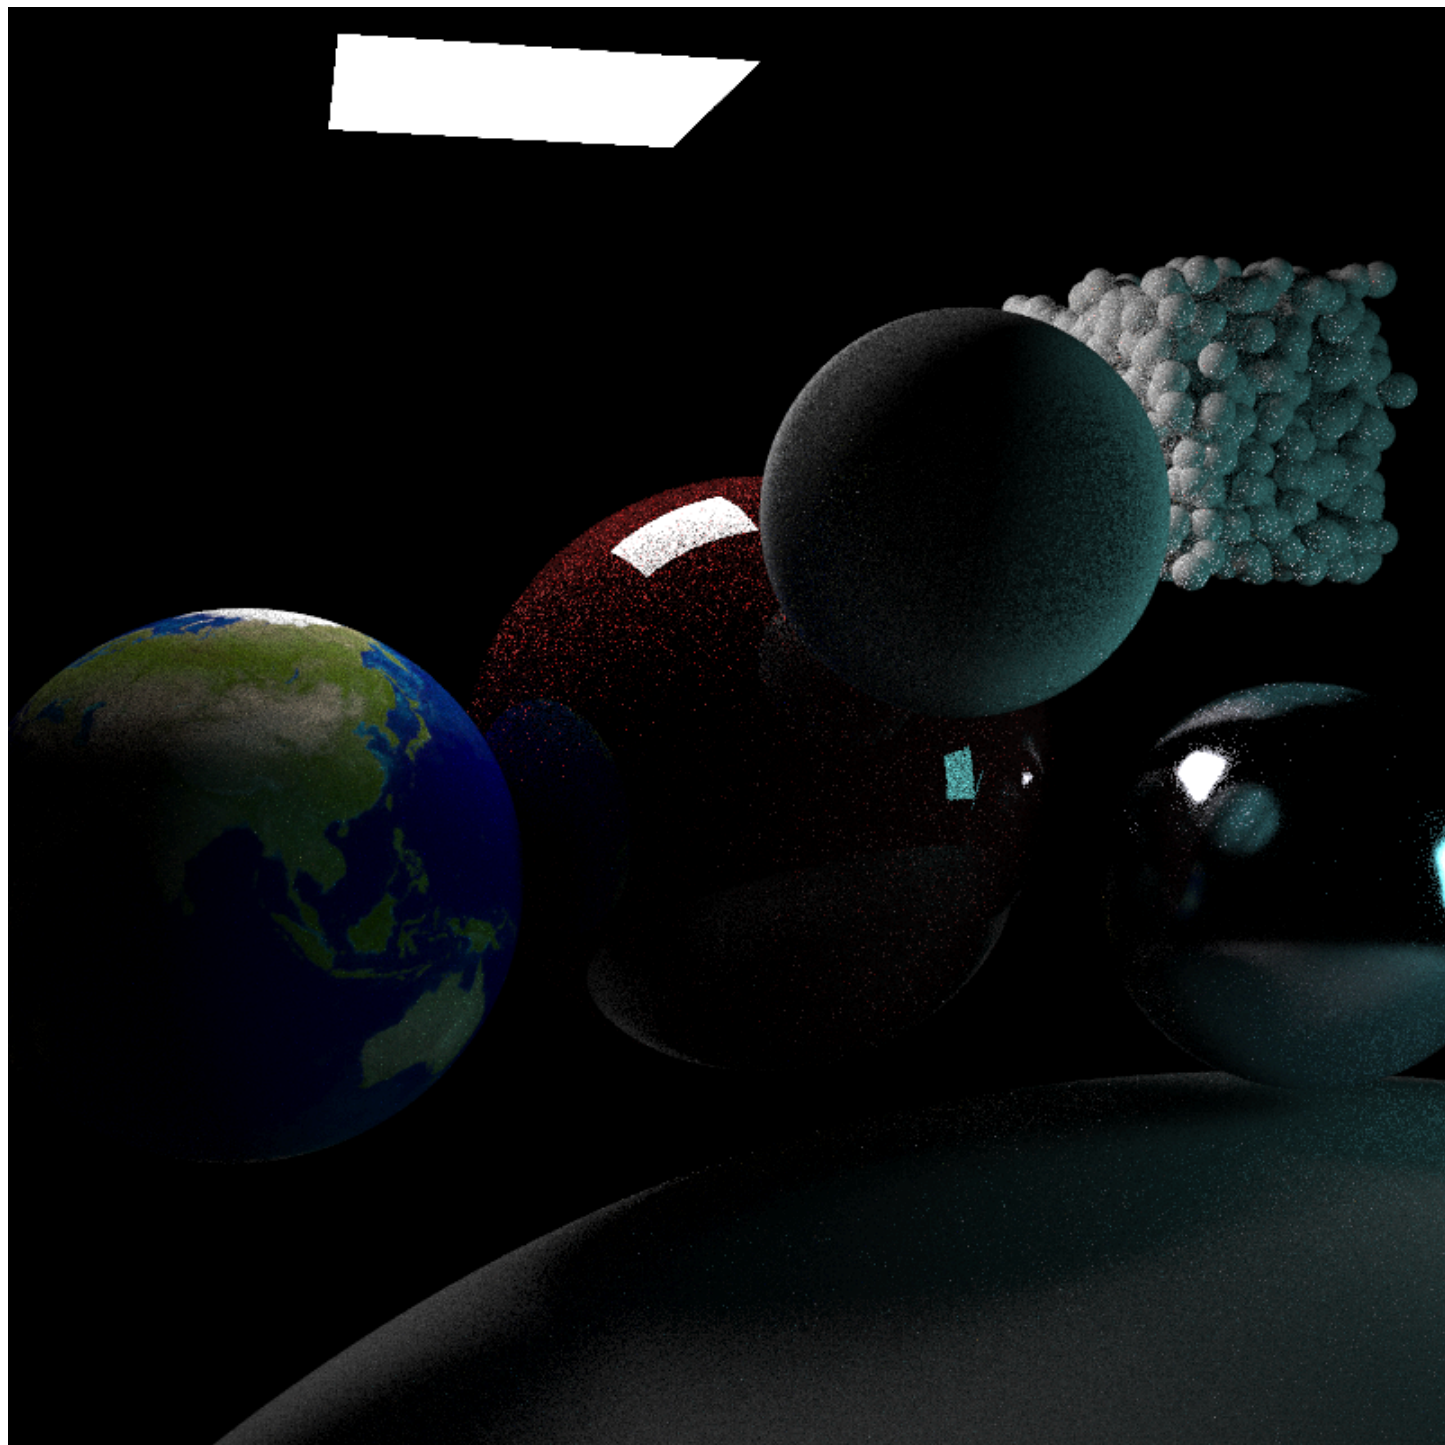

部分草图：
